Driveway Permit Regulations

On July 7, 2008, The Lowell City Council approved an ordinance directing the City Engineer's office to establish a Driveway Permit program. This permit and associated regulations brings together existing regulations from Zoning and Sub-division rules into one document.

Beginning on October 1, 2008, a Driveway Permit will be required for all driveway work (other than crack sealing). New driveways, repaving of existing driveways, and widening existing driveways all fall under this regulation.

To apply for a Driveway Permit, pick up an application in the City Engineer's Office, City Hall, 3rd Floor.

For more information, see the City of Lowell web site: www.lowellma.gov or call the Engineering Office 978-970-3330.
